

MEMS Booster Club

parent teacher group

Dear Parents and Guardians,

We wanted to take this opportunity to introduce ourselves to all incoming MEMS parents and guardians. We are the MEMS Booster Club. At MEMS, this is what we call our parent teacher group. Just like at other schools we sell spirit wear, organize dances and many other fun events for the students. All of the money raised from membership dues goes to the students. The Booster Club typically pays for assemblies throughout the year, the agendas/planners all students receive, the 7th grade Fun Day and the 8th Grade Dance (and many other things). We know this year will be different, but we are hoping to provide as much as we have done in the past as well as keep the MEMS spirit alive for all of our students. Becoming a Booster Club member doesn't require any commitment from you. Please become a member today by joining online, using our website.

www.memsboosters.org

We are also opening our online spirit wear store to allow all incoming 7th graders to place an order for their spirit wear prior to our tradition Fall sale. All orders can be picked up at our vendor in Manalapan, completely contact free. Please use the following link to place an order.

For those on Facebook, we have the official MEMS Booster Page, run by the MEMS Booster Club. It is called **Manalapan-Englishtown Middle School Official Page**. Please join our page over the summer. You will be asked to answer several questions, as we only allow current parents/guardians of students to be on this page. For community, please just put PB Student.

All of our Booster meetings will be held virtually this year. This is a great opportunity to stay informed and be able to ask questions of us and the Principal. More information on the virtual meetings and dates will follow.

Lastly, we hope you and your family have a safe and wonderful summer! We cannot wait for our newest Bears to start MEMS. If you have any questions, please feel free to email us at memsboosterorg@gmail.com.

Warmest regards,

MEMS Booster Club
