Seasonal Allergies Notification

Dear Parents/Guardians:

I hope you are all enjoying the spring season! I wanted to take a moment to address the seasonal allergies that come along with spring.

As you may be aware, many children experience seasonal allergy symptoms during this time of the year. Symptoms can range from mild to severe and may include sneezing, congestion, runny nose, itchy/watering eyes, and coughing. These symptoms often cause discomfort in your children while at school.

Therefore, it is encouraged that you monitor your child closely for any signs of seasonal allergies. If you notice that your child is experiencing symptoms, it's important that you consult with their healthcare provider as soon as possible. Your child's doctor can provide guidance on the best course of action and treatment to alleviate the symptoms. By proactively addressing seasonal allergy symptoms, you can assure they receive the care they need, while also making them more comfortable during school hours.

If you have any questions or concerns, please feel free to call me.

Sincerely,

School Nurse
