

# Learn to Code!

## WHAT IS CODING?

Coding is what makes games, websites, and applications possible. The apps on iPads and the games on Xbox are all made with code.

## WHAT'S IT ALL ABOUT?

It's a before-the-school-day computer coding club for 4th and 5th graders who want to learn how apps and games are created.

## DO I NEED TO BE GOOD AT COMPUTERS?

No way! You just need basic computer skills and the desire to learn! If you know how to use a mouse and keyboard then you've already got what it takes.
